

A LEADING PROVIDER OF ELECTRICAL SAFETY SERVICES

Arc Flash Studies

Gain a comprehensive understanding of potential hazards and recommended mitigation strategies tailored to your unique facility.

IR Inspections

Detect hidden electrical faults and address them proactively to prevent costly downtime and accidents.

Electrical Safety Training

Equip your team with the knowledge and skills needed to work safely around electrical systems, ensuring OSHA compliance.

VR-Driven Training with LMS Support

Embrace cutting-edge technology for immersive and cost-effective safety training.

Continuous improvement, making a difference for personnel safety, and program compliance is at the heart of Learning@Hallam's origin story.

Our staff of Electrical Safety Specialists, curriculum developers, and platform managers take great pride in providing a solution that does more than check the box of electrical safety compliance.

Across various industries, we have made a positive impact for over 1,000 personnel participating in the Learning@Hallam program and have completed over 4,500 electrical safety-related projects.

Hallam-ICS is enthusiastic about the prospect of contributing to your company's electrical safety compliance and personnel development.

Learning@Hallam

ANNUAL PROGRAM

THOROUGH, ACCURATE, AND
SAFETY-FOCUSED EXPERIENCE

Why Choose Hallam-ICS?

Expertise

With a strong focus on safety and compliance, our team is committed to helping you achieve the highest standards.

Tailored Solutions

We understand that one size does not fit all. Our services are customized to meet your specific needs.

Cost Savings

Bundling our services can provide attractive discounts, adding value to your organization.

WHAT IS Learning@Hallam?

Hallam-ICS provides a one-year account access for positions within your organization in our online eLearning platform, Learning@Hallam, and for additional services.

The annual program includes:

Attendee Data

Pre and Post Course Surveys will be captured as part of our eLearning courses for Learning@Hallam and your company to make sound decisions on training adjustments as needed.

Skills Evaluation Data

Custom Observation Checklist(s) are developed in accordance with your personnel's respective job duties, based on your Standard Operating Procedures, OSHA & NFPA 70E requirements, and job-specifications as well as OSHA and NFPA 70E requirements. Hallam-ICS Electrical Safety Specialists will train personnel designated by you on how to perform a Field Work Audit utilizing the custom Observation Checklist(s).

Site Safety Audit

Hallam-ICS Electrical Safety Specialist will conduct a site electrical safety audit once per year. Findings will be delivered to you by Executive Summary and utilized to improve training provisions and recommendations for Electrical Safety Policy adjustments. Audit can include observing technicians creating an Electrically Safe Work Condition.

Data Analysis

Hallam-ICS will capture all the above data digitally through its online platform, Learning@Hallam, and access will be granted to you.

Continuous Improvement

Quarterly meetings with the Learning@Hallam team are held to review user progress, satisfaction, and any of your additional needs.

Online eLearning Courses

All publicly published courses will be made available to all attendees for the duration of the agreement.

- Electrical Safety – Awareness (ES-A)
- Electrical Safety – Qualified Electrical Worker – Low Voltage (ES-QEW-LV)
- Electrical Safety – Qualified Electrical Worker – High Voltage (ES-QEW-HV)
- Control of Hazardous Energies - Lockout/Tagout (LOTO)
- Human Performance Errors (HPE)
- **Every future publicly developed course**

Semi-Annual Safety Briefings

Hallam-ICS Electrical Safety Services Specialists will provide a two-hour (2-Hour) Virtual Safety session with your personnel semiannually. Session topics will include but are not limited to, your company's policy changes, implementations, and findings from Field Work Audits performed by Hallam-ICS Electrical Safety Specialists. Sessions will be recorded and made readily available to your users.

Administrative Access

Administrative accounts with rights to create, enroll, and deactivate accounts are provided for the duration of the agreement. Administrative accounts can obtain survey information, individual Observation Checklist performance, Final Exam scores, and certificate retrieval of every attendee for compliance records needs without having to track down paperwork.

Active accounts are based on the user maintaining employment with your company.
